Hi Rainmakers:

A reminder to everyone, be sure every time you attend a monthly meeting you put your name in the free membership box, and in January we will have a drawing for a free membership, but you must be present to win.

Also at the April meeting we will have our first drawing for 2 Saturday lite rides for May, they will be posted in the Raindrop so please watch for dates and destinations. Also after the 50-50 drawing at each meeting we will have a drawing for a special prize.

The weather has been pretty nice the last couple of Sundays, and we have had some good show up rides, anyone that didn't show up really missed some good riding.

## Hydration and Health

Submitted By Judy Balzar

### How much should we drink? 2 Liters of fluid a day

Hydration comes from any drinks. Tea, coffee, coke, all sodas, fruit juices, even beer!

Most important supply for hydration is WATER. We get approximately half a liter from the food we eat each day; this is about a quarter of the daily needs; this comes mostly from fruit and vegetables.

Drinking plenty of water is beneficial to the immune system, good for the skin, helps prevent constipation, can reduce the risk of kidney stones.

Dehydration can cause serious problems in older adults. Mild dehydration may cause constipation.

Older adults at higher risk related to losses in muscular mass, total body water, and bone mass. Also the THIRST SENSATION decreases with age.

Dehydration can make you feel tired, no energy, not wanting to do anything, sleepy, and just not wanting to move about.

With decrease of the thirst sensation you need to drink even when you do not feel thirsty.

Tips to keep hydrated:

1. Drink plenty of water & juice at meal times and between meals.
2. Avoid coffee, tea, and sodas with caffeine.
3. Have more soups with your meals.
4. Keep a glass of water to drink when you are watching TV or relaxing.
5. Drink plenty of extra fluids after getting even mild exercise.
6. Keep informed of medications that might cause water loss.
